What can we do?

Our professional engineers have a wealth of global railway knowledge and experience. By growing their experience in the rail industry for many years, our engineering team have the expertise to meet the requirements demanded by the industry standards, our customers and the Safety Approval Authority.

By developing new systems and products from design concept through to in-service maintenance; our engineers work closely with, and help guide our customers throughout the development life cycle.

Rowe Hankins Ltd. is committed to continual improvement, development and growth with a complete understanding of their customer, end-user and future rail market requirements.

Electronic Servicing

The Rowe Hankins electronic service department specialises in service, repair and maintenance of various traction systems including OTMR's (On Train Monitor Recorder).

The diagnostic software/hardware is used to test a range of OTMR's. Bespoke system test equipment to represent all OTMR interfaces can be designed, ensuring full functionality is tested before returning to the customer. With capability to test/repair many other trainborne systems & components such as ; 'Optical Pulse Generators' used for train speed measurement.
